

WHAT is our solution?

Linguistic Asset Management

Translations are a strategic asset in every line of business. That's why we have set out to provide you with the most modern, technology-driven translation service available.

We place the accent on efficiency through maximizing the value of all your language assets.

- We support technological innovation.
- We believe in sustainability.
- We set and adhere to the highest security standards.

Results: your content translated with higher quality, lower costs and faster than ever!

WHO are we?

Transenter is creating cutting edge translation environments based on content reuse, automated translation and modern translation process management.

WHY choose Transenter?

Quality

We offer high quality translation + content translation that includes cultural adaptation.

Security

No risk of losing confidential data, because we maintain the highest security standards.

Adaptability

We are always prepared to offer a tailor-made solution. We are ready to deal with project modifications, even if the content volume increases and the deadline shortens.

Speed

Faster is always better, just so long as the highest quality is maintained. We employ innovative technologies to deliver several times faster than regular human translation speed.

Cost effectiveness

The most efficient technologies support the translation process. Avoid the risk of unnecessary duplication of effort, costly, time-consuming document loops, and wasted energy, paper, and increased CO2 emissions.

HOW do we do it?

Combining the best of both worlds:

traditional translation + technology = quality, accuracy, innovation, flexibility, cost-effectiveness, consistency, security.

imlingo

imlingo.com is a secure and accessible online platform where all translation processes within a company are integrated into a single site. This allows you to handle the translation process far more effectively.

1 Infinite integration possibilities by creating a Custom Engine

Whenever your business anticipates expanding requirements (ERP, CRM, CMS, multilingual chat... and more on clients demand)

2 Quality differentiation

To meet your expectations in every field of everyday activity (instant, enhanced and premium)

3 Secure environment

No claim to ownership of your content.
No leaking of confidential data
